NEVER STOP BEING SAFE

**SAFETY WORKWEAR**  
GENERAL CATALOGUE

# 30 YEARS OF KARIN

Born from the passion of those who have made safety their mission, Karin is today a company capable of satisfying the demands of users operating in high-risk sectors with dedicated accident prevention clothing lines.

An active and constantly evolving market, has allowed Karin to acquire in thirty years of history, the experience necessary to study and produce high-performance products, design and materials increasingly innovative, able to meet any demand for protection and comfort.

This continuous desire for growth and passion have allowed the company to make innovation and quality its trademark, thus becoming a partner of excellence in the safety industry thanks to its Personal Protective Equipment.

MULTIPRO

MULTIPRO

KARIN

# MULTIPRO

A unique combination of the highest level of safety, best functionality and excellent comfort. This series offers top-quality products with antistatic, acid-resistant, flame-retardant as well as weatherproof properties. The products in this range are manufactured to the strictest standards using top-quality raw materials and in accordance with the design requirements defined by the standards. All garments are manufactured in our own factories in the European Community and carry the CE marking.

## Lasting Performance

All the garments in this line are made from high-performance and durable fabrics, guaranteeing high performance even long after their first use. New models have been introduced and others have been restyled with the idea of introducing the following: **modern/design look - slim fit - lightness - comfort**

# MULTIPRO

## LIGHTWEIGHT

Karin's Lightweight garments have the advantage of being space-saving and extremely comfortable, thus guaranteeing the right amount of comfort while working and allowing great freedom of movement.

## BREATHABLE

All the garments in the Breathable line are extremely breathable to ensure greater comfort by speeding up the process of evaporation of sweating, slowing down the formation of moisture on the skin and maintaining temperature constant. This feature allows moisture to be absorbed and expelled later, thus performing an important thermoregulating function.

## WATERPROOF

The fabrics of the Karin Waterproof line repel water and at the same time favour the passage of water vapor, guaranteeing impermeability and breathability for those who need to be protected and dry at all times, even in the most heavy rain.

## SLIM FIT

Karin's protective clothing line combines safety and comfort thanks to modern fabrics and a slim fit that adapts perfectly to the body's movements, making the garments even more comfortable and more functional.

# AVAILABLE TECHNOLOGIES

K840 | Shell

FEATURES

- / Wrap high collar with concealed inner hood
- / Central fastening with zipper covered by flap with press studs
- / Two chest pockets and two slant pockets on front covered with flap
- / Fitted sleeves with adjustable cuffs

# MULTIPRO HV

MULTIPRO HV

## MULTIPRO HV

A search for the highest level of safety, best functionality and excellent comfort. This series offers products of the highest quality which, in addition to having antistatic, antiacid, flame retardant, waterproof and weather protection properties, is complemented by the use of high visibility fabrics and retro-reflective bands. The products in this range are manufactured to the strictest standards using the highest quality raw materials and according to the design requirements defined by the regulations. All garments are manufactured in our own factories in the European Community and carry the CE marking.

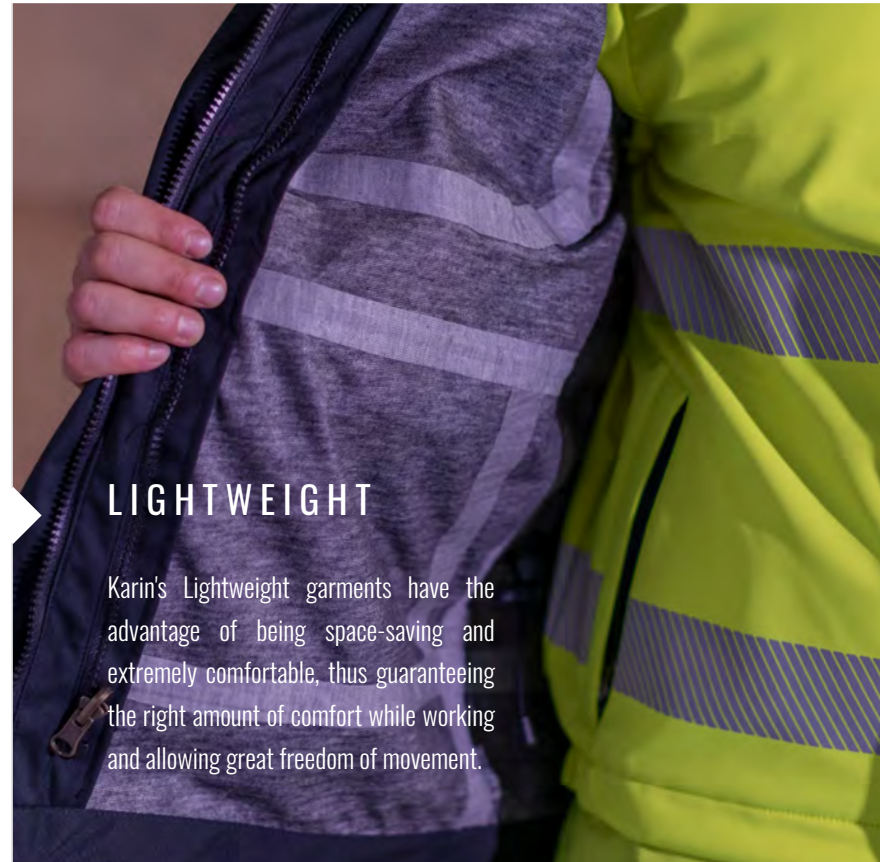

## Lasting Performance

All the garments in this line are made from high-performance and durable fabrics, guaranteeing high performance even long after their first use. New models have been introduced and others have been restyled with the idea of introducing the following: **modern/design look - slim fit - lightness - comfort**

# MULTIPRO HV

## LIGHTWEIGHT

Karin's Lightweight garments have the advantage of being space-saving and extremely comfortable, thus guaranteeing the right amount of comfort while working and allowing great freedom of movement.

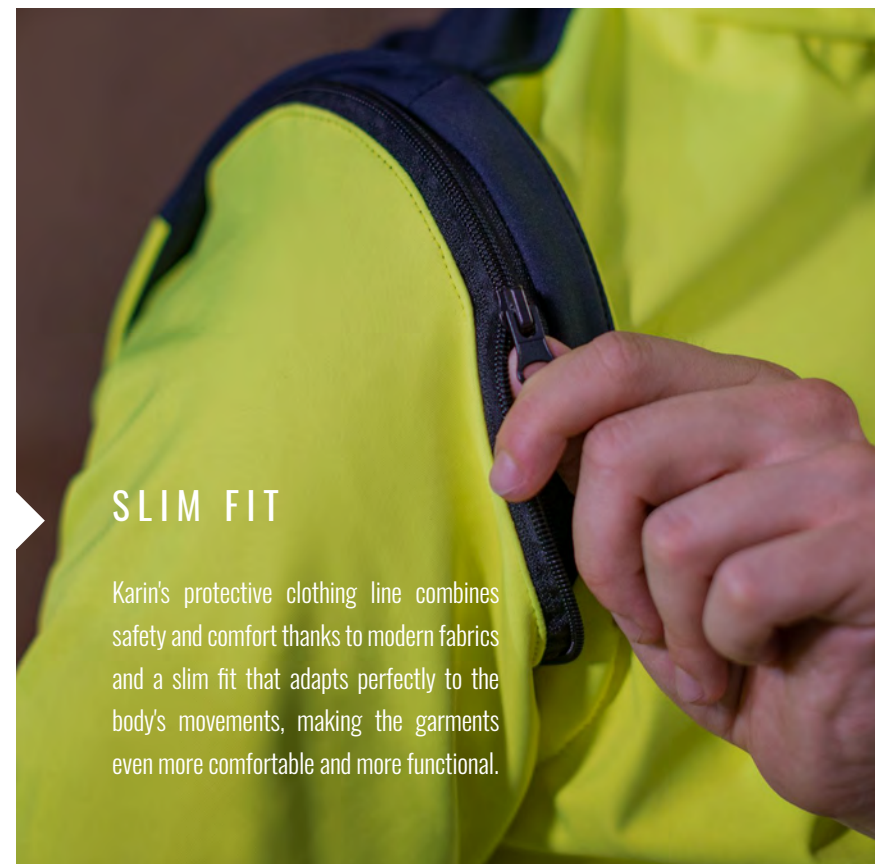

## BREATHABLE

All the garments in the Breathable line are extremely breathable to ensure greater comfort by speeding up the process of evaporation of sweating, slowing down the formation of moisture on the skin and maintaining temperature constant. This feature allows moisture to be absorbed and expelled later, thus performing an important thermoregulating function.

## WATERPROOF

The fabrics of the Karin Waterproof line repel water and at the same time favour the passage of water vapor, guaranteeing impermeability and breathability for those who need to be protected and dry at all times, even in the most heavy rain.

## SLIM FIT

Karin's protective clothing line combines safety and comfort thanks to modern fabrics and a slim fit that adapts perfectly to the body's movements, making the garments even more comfortable and more functional.

# HIGH VISIBILITY

◀ HIGH VISIBILITY

# HIGH VISIBILITY

Fluorescent clothing provides maximum safety and visibility, is available in safety classes 2 and 3 and is ideal for road construction sites and urban and suburban work environments. For comfort and breathability, all our garments are made from cotton-blend fabrics. These fabrics combine the strength of polyester with the breathability and comfort of cotton, for a pleasant skin feel. All garments are manufactured in our own factories in the European Community and carry the CE mark.

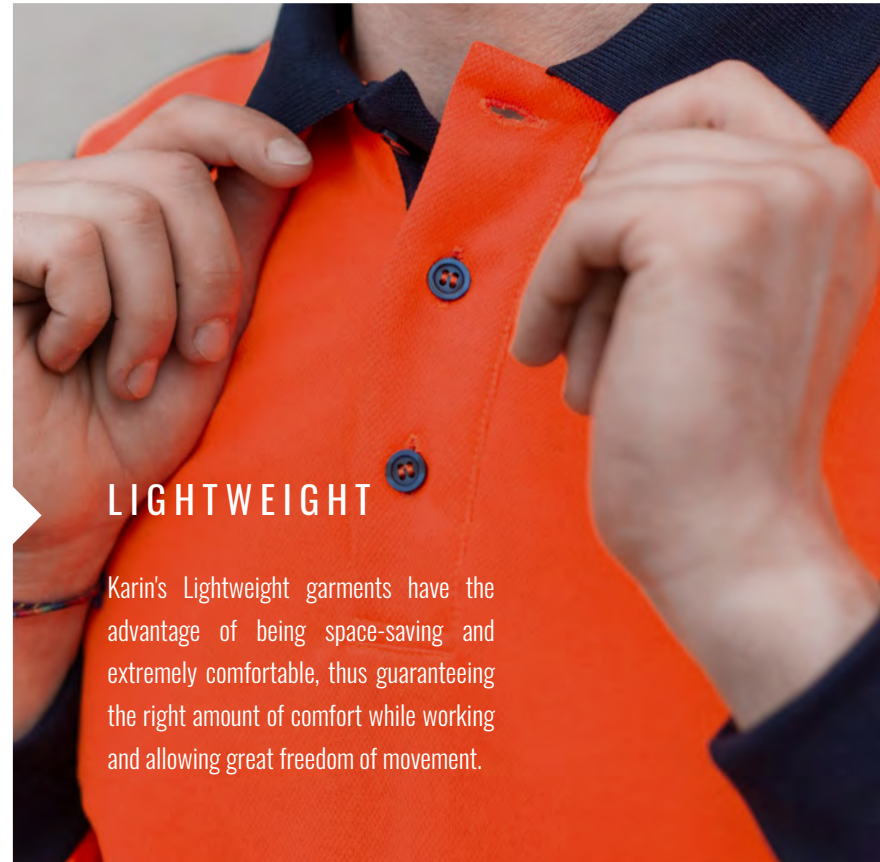

## Lasting Performance

All the garments in this line are made from high-performance and durable fabrics, guaranteeing high performance even long after their first use. New models have been introduced and others have been restyled with the idea of introducing the following: **modern/design look - slim fit - lightness - comfort**

# HIGH VISIBILITY

## LIGHTWEIGHT

Karin's Lightweight garments have the advantage of being space-saving and extremely comfortable, thus guaranteeing the right amount of comfort while working and allowing great freedom of movement.

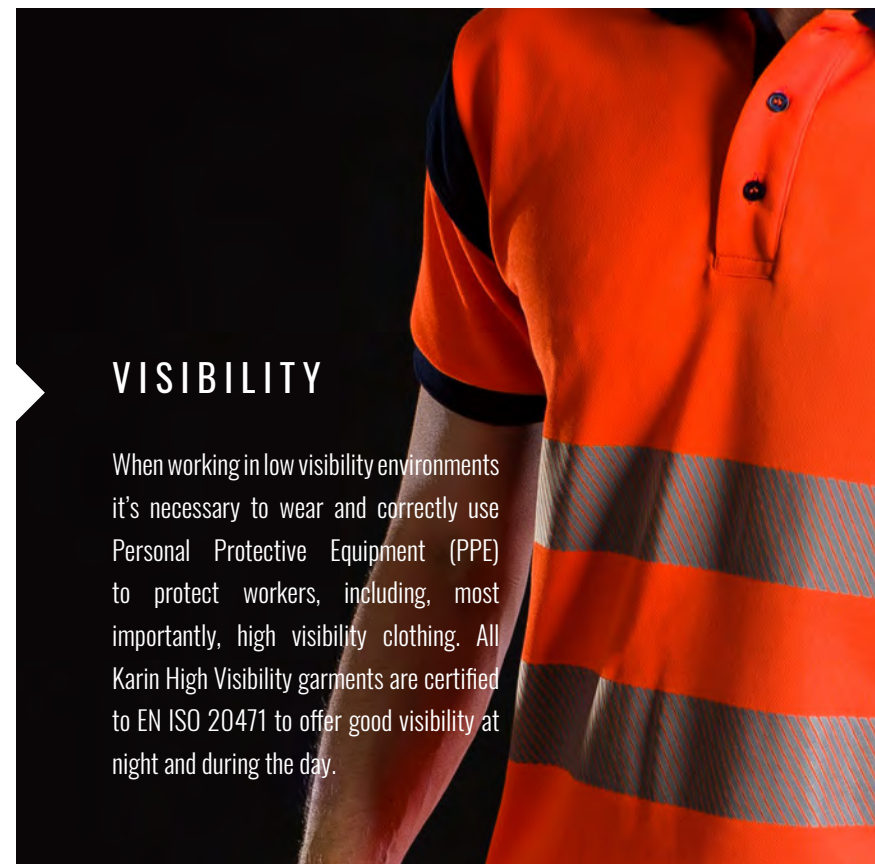

## BREATHABLE

All the garments in the Breathable line are extremely breathable to ensure greater comfort by speeding up the process of evaporation of sweating, slowing down the formation of moisture on the skin and maintaining temperature constant. This feature allows moisture to be absorbed and expelled later, thus performing an important thermoregulating function.

## INSULATION

Karin Insulation provides high thermal insulation that maintains the body temperature constant even in extremely cold conditions. This property makes Karin fabrics suitable for insulation from the cold and high protection from atmospheric agents.

## VISIBILITY

When working in low visibility environments it's necessary to wear and correctly use Personal Protective Equipment (PPE) to protect workers, including, most importantly, high visibility clothing. All Karin High Visibility garments are certified to EN ISO 20471 to offer good visibility at night and during the day.

# FIRE FIGHTERS

# FIRE FIGHTERS

This type of clothing is mainly used by fire fighters, but also by fire prevention personnel in industry. It is made with the utmost care and with the best fireproof materials, so that heat cannot penetrate into the clothing. The garments are made with multi-layered fabrics to meet different requirements: the outermost layer, which acts as a first shield, is fireretardant and heat-resistant; the breathable under layer protects against the penetration of sweat and allows water vapour to escape; and the inner lining provides an air pocket to protect the operator from external heat. Another feature of these garments is the presence of retro-reflective bands that allow workers to be visible even during operations with poor visibility. All garments are manufactured in our own factories in the European Community and carry the CE mark.

## Highest Protection

All the garments in this line are also made from high-performance and durable fabrics to ensure consistently high performance. The entire outfit has been reworked, improving certain characteristics such as:  
**lightness - heat insulation - flame protection - comfort - durability**

# FIRE FIGHTERS

## LIGHTWEIGHT

Karin's Lightweight garments have the advantage of being space-saving and extremely comfortable, thus guaranteeing the right amount of comfort while working and allowing great freedom of movement.

## BREATHABLE

All the garments in the Breathable line are extremely breathable to ensure greater comfort by speeding up the process of evaporation of sweating, slowing down the formation of moisture on the skin and maintaining temperature constant. This feature allows moisture to be absorbed and expelled later, thus performing an important thermoregulating function.

## FIRETECH

All of Karin's Fire Tech garments, designed specifically for the fire service, are engineered to provide extremely high levels of protection from the flames and heat generated during a fire, whilst remaining highly breathable. Karin products are specifically designed to help managing thermal stress better by providing the highest level of breathability even in the most extreme conditions.

## SLIM FIT

Karin's protective clothing line combines safety and comfort thanks to modern fabrics and a slim fit that adapts perfectly to the body's movements, making the garments even more comfortable and more functional.

# ARC FLASH

ARC FLASH

# ARC FLASH

Arc flash specific protective work clothing protects against accidental, unexpected shortcircuiting in high-potential electrical installations, where air ionisation develops, producing intense heat, toxic gases and ultraviolet radiation. The thermal energy developed can be up to four times that of a strong flame. This type of safety clothing is part of our line of multi-protection accident prevention workwear which, in addition to being tested in relation to the arc flash, protects against heat, flames, static electricity and chemicals. The products in this range are manufactured to the strictest standards using the highest quality raw materials and according to the design requirements defined by the regulations. All garments are manufactured in our own factories in the European Community and carry the CE mark.

## Lasting Performance

All the garments in this line are made from high-performance and durable fabrics, guaranteeing high performance even long after their first use. New models have been introduced and others have been restyled with the idea of introducing the following: **modern/design look - slim fit - lightness - comfort**

# ARC FLASH

## LIGHTWEIGHT

Karin's Lightweight garments have the advantage of being space-saving and extremely comfortable, thus guaranteeing the right amount of comfort while working and allowing great freedom of movement.

## BREATHABLE

All the garments in the Breathable line are extremely breathable to ensure greater comfort by speeding up the process of evaporation of sweating, slowing down the formation of moisture on the skin and maintaining temperature constant. This feature allows moisture to be absorbed and expelled later, thus performing an important thermoregulating function.

## STRETCH

Karin's line of stretch garments revolutionises the performance expected of fabrics in terms of comfort, offering greater freedom of movement and excellent fit. The excellent elasticity and shape recovery capabilities make the garments flexible and able to follow movements, without altering the structure, but maintaining the original shape and appearance.

## SLIM FIT

Karin's protective clothing line combines safety and comfort thanks to modern fabrics and a slim fit that adapts perfectly to the body's movements, making the garments even more comfortable and more functional.

# CIVIL PROTECTION & RESCUE

## CIVIL PROTECTION & RESCUE

This line is dedicated to rescue clothing and is suitable for use by all civil protection and rescue workers. Refined and functional work uniforms for every type of emergency. As for high visibility, to guarantee comfort and breathability, all our garments are made of cottonblend fabrics, combining the resistance of polyester with the breathability and comfort of cotton, for a pleasant sensation on the skin. All garments are manufactured in our own factories in the European Community and are CE marked.

## Superior Comfort

All the garments in this line are made from new generation fabrics with stretch characteristics and greater breathability, thus ensuring greater comfort. New models have been included and others have been restyled with the idea of introducing the following: **modern look/ design - slim fit - lightness - comfort**

# CIVIL PROTECTION & RESCUE

# FOOD

# FOOD

Food clothing must be made taking into account every hygiene aspect of the workplace. For this reason, we have developed a range of 100% cotton garments with a certified Sanitized® antibacterial treatment. This ensures cleanliness and breathability of the garment, as well as guaranteeing adequate comfort throughout the working day. All garments are manufactured in our own factories in the European Community and carry the CE mark.

## Lightweight Insulation

The garments are padded with a fibre that provides greater thermal insulation despite smaller volume, making them more practical and comfortable. New models have been added and others have been restyled with the idea of introducing the following: **insulation from the cold - slim fit - lightness - comfort**

FOOD

## LIGHTWEIGHT

Karin's Lightweight garments have the advantage of being space-saving and extremely comfortable, thus guaranteeing the right amount of comfort while working and allowing great freedom of movement.

## BREATHABLE

All the garments in the Breathable line are extremely breathable to ensure greater comfort by speeding up the process of evaporation of sweating, slowing down the formation of moisture on the skin and maintaining temperature constant. This feature allows moisture to be absorbed and expelled later, thus performing an important thermoregulating function.

## INSULATION

Karin Insulation provides high thermal insulation that maintains the body temperature constant even in extremely cold conditions. This property makes Karin fabrics suitable for insulation from the cold and high protection from atmospheric agents.

## STRETCH

Karin's line of stretch garments revolutionises the performance expected of fabrics in terms of comfort, offering greater freedom of movement and excellent fit. The excellent elasticity and shape recovery capabilities make the garments flexible and able to follow movements, without altering the structure, but maintaining the original shape and appearance.
